Solution-oriented bedrooms

The priorities when planning bedrooms, where we spend one-third of our lives, naturally vary depending on the room and owner. But modularity which adopts to different scenarios depending on the user's needs, makes it easy to add new styles, colours, textures, and patterns in a solution-oriented life.

Nicole Bedroom

Bedrooms are the centre for rest and deep sleep so their design should be arranged as comforting by natural tones and soft transitions. Doğtaş Bedroom Sets adds style and harmony to homes, with the pieces that are ergonomic, easy to use, and inspired by nature.

FUNCTIONAL ARRANGEMENTS

What matters is making the bedroom as efficient as possible. For example, it makes sense to place the bed right in the middle of the room in small and restricted spaces to be able to reach everything easily. Leaving an empty space around the bed allows you to arrange the room with furniture that meets your needs. Similarly, the textiles and other accessories used in the room shall add to the sense of spaciousness.

UNLIMITED OPTIONS

When there is not enough space in the room for a single wardrobe, it makes sense to use modular systems that you can break up and sliding doors. Beds with storage spaces, poufs , chests of drawers and bed stands of different heights, and functional dressing tables create extra space in the room while mirrors add depth. Equally decorative accessories, textiles, and lighting will complement this stylishness.

WHAT SHOULD THE BEDROOM DECORATION BE LIKE FOR A GOOD NIGHT'S SLEEP?

Tidiness is the key towards a calm feel in the bedroom. A bed with tall legs instead of one that is level with the floor can be preferred to maximise the positive energy flow in the room. A calm atmosphere creates the suitable space for a night sleep. But this does not mean that using colours and patterns to create a peaceful atmosphere is completely incorrect..

In cold climates, green, blue, yellow, and light pink are a much better choice than white for their relaxing effect. One could use a layered design to create a cosy atmosphere. Textures are the way to go here. For example, in cold climates, velvets and tweed can be used while in hot climates, flannel, linen, and silk would be a better choice. Duvet covers, blankets, and throws in contrasting colours and lots of throw pillows can create a colourful look. The correct lighting can change the mood.

All the lights in the bedroom should have dimmer switches and lamps, floor lamps, and appliqué lights to spot lighting should be preferred.

The Frame Bed stand brings the natural character of wood into the bedroom and it takes its place at your side with its plain oak coloured drawer and practical yet modest design.
