Ultra Comfort Mattress Technical Details

Product Properties

- The fabric produced with special materials giving rabbit feather softness, besides providing superior comfort, does not harm your baby's skin with its silky surface.
- The feather-soft foam layer, which provides flexibility for your baby's sleep, provides a comfortable sleep.
- Specially shaped air ducts on the surface allow the mattress to breathe continuously. Thanks to the shapes of the channels, a natural air flow occurs in the mattress, and the mattress does not contain moisture and odor.
- The mattress is designed to be used on one side.

Material Information

- Top surface produced with baby face soft fabric
- Bottom surface produced with polyester soft fabric
- Bottom internal layer has 18 DNS soft foam layer
- Top internal layer has 25 DNS KTY duct soft foam
- In the beds with a height of 8 cm, a single piece and a foam layer with 18 DNS air ducts on the upper surface are used.
- In the beds with a height of 13 cm, two pieces of foam layers, namely lower 18 DNS and upper 25 DNS with air ducts, are used.

Washing and Usage Instructions

- Mattress fabric is not suitable for cleaning with extremely wet cloth or washing machines.
- Damp cloth must be used during cleaning.
- Cleaning materials containing chemicals such as detergents, bleach etc. Should not be used.
- The stains that may form on the bed should be intervened immediately.
- Direction of mattress within the bedstead must be changed periodically.
- The bed should be kept upright when not in use, it mustn't be folded.
